FOOTWEAR FABRIC

WE COULDN'T FIND ANY VOLUNTEERS TO WALK THROUGH 500 MILES OF WATER, SO WE BUILT A MACHINE.

THE IDEAL COMBINATION OF PROTECTION, AGILITY, AND COMFORT

It's no accident that GORE® CROSSTECH® Footwear Fabric is the industry leader. Gore has been creating solutions for the fire and safety industry for over 35 years. The advanced technology in GORE® CROSSTECH® Footwear Fabric provides durable, breathable protection without compromising comfort or agility.

Protects Against Liquid Penetration

GORE® CROSSTECH® Footwear Fabric meets and exceeds the standards for blood and body fluid penetration protection. Leather footwear with GORE® CROSSTECH® Footwear Fabric also protects against penetration by water and NFPA common chemicals. Every seam in footwear made with GORE® CROSSTECH® Footwear Fabric is seam-sealed with GORE-SEAM® tape. It's an exclusive technology developed and supported by Gore to provide maximum protection to the people in the field.

Better Fit, Less Fatique

Leather footwear with GORE® CROSSTECH® Footwear Fabric is lighter weight and offers better agility. Unlike rubber footwear, this leather footwear provides a breathable barrier against contaminants while keeping feet dry and comfortable. Leather boots made with GORE® CROSSTECH® Footwear Fabric are the better-fit, fatigue-fighting footwear of choice for firefighters.

Reliably Waterproof

Leather footwear made with GORE® CROSSTECH® Footwear Fabric is highly breathable and waterproof. It keeps feet dry while resisting moisture, even when standing in water. And it retained its waterproof protection after exposure to contaminants.

Thermal Protection

GORE® CROSSTECH® Footwear Fabric stands up to the tough conditions structural firefighters face in the field. It is exceptionally durable even when repeatedly exposed to extreme heat.

Easy Care and Decontamination

Leather footwear made with GORE® CROSSTECH® Footwear Fabric is easy to clean and decontaminate. Most cleanups can be done with a cloth or brush, and soap and water. With this simple cleaning procedure, many chemicals can be easily removed.

GORE® CROSSTECH® FOOTWEAR FABRIC

Water, blood, body fluids, and NFPA common chemical protection provided by membrane Perspiration moves away from the wearer

Every bootie made out of GORE® CROSSTECH® Footwear Fabric must pass a waterproofness test before being used in leather footwear. The bootie is filled with air and then submerged in water to check for leaks.

YOUR SAFETY. YOUR PERFORMANCE. OUR COMMITMENT.
