EXPERIENCE COMFORT IN PROTECTION

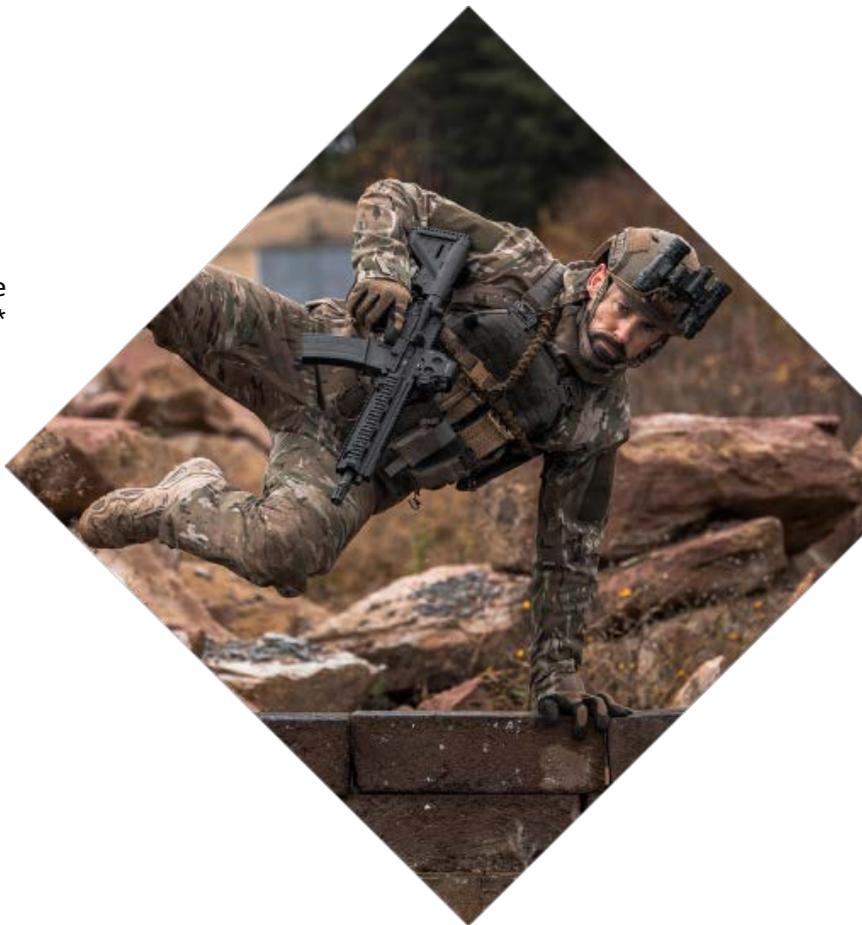

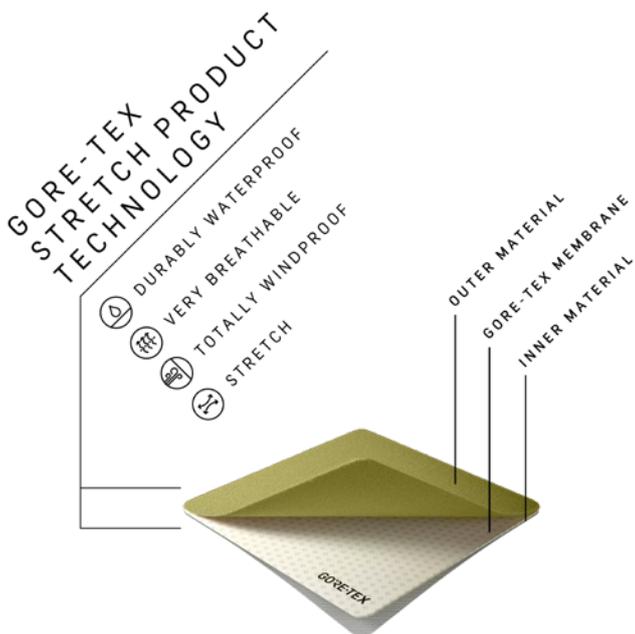

GORE-TEX STRETCH GARMENTS

When being out in the world's most demanding environments soldiers no longer have to compromise between reducing thermal burden and freedom of movement. GORE-TEX Stretch garments combine highest level of protection with comfort and durability.

NEXT GENERATION GORE-TEX STRETCH GARMENTS

GORE-TEX Stretch garments combine optimized comfort, high durability and high protection. Their stretch ePTFE membrane technology enables the design and construction of garments with a more tailored fit which improves the garments evaporative resistance and increases breathability by up to 25%* as compared to current GORE-TEX Outerwear.

FULL PERFORMANCE OF A GORE-TEX 3L HARDSHELL COMBINED WITH ALL THE ADDED BENEFITS OF STRETCH

3L GORE-TEX Products

- Durable waterproofness and high breathability
- Mechanical durability abrasion, pilling etc.
- Low water pick up of face material
- Light weight face material
- Cold flex durability of membrane
- Resistance to contamination (DEET, petrol, motor oil and lubricants)

Stretch

- Thermal burden reduction
- High agility and mobility
- Adaptive fit with a reduced air gap
- High flexibility in cold climates
- Noise reduction
- Soft hand

* Testing conducted at NC State University
