Extreme performance and extreme
comfort in a lightweight design

All leather upper

200-gram insulated,
removable bootie

Speed laces

Waterproof,
breathable
GORE-TEX®
barrier

Rubber lug outsole

INTERMEDIATE COLD/WET BOOT WITH GORE-TEX® FABRIC

Unlike typical all-leather boots, the ICW Boot doesn't need to be treated with "waterproofing" polish or wax. The GORE-TEX® lining completely surrounds the foot, making a barrier that liquid cannot penetrate.

The 10-inch-tall upper on the ICW Boot is all leather for durable wear resistance in abrasive conditions. Inside the boot is a 200-gram insulated, removable bootie, to keep your feet warm and comfortable.

The bottom is made of a polyurethane mid-sole and a durable Vibram® rubber out-sole for excellent shock absorbency and traction.

The ICW Boot comes with two sets of insulated, removable booties. If water saturates the inside of your boot from the top, you can simply replace the insulated bootie for faster dry-out. Without the insulation, your boot will remain waterproof since the GORE-TEX® lining is part of the leather boot construction.

For more than 30 years, W. L. Gore & Associates, Inc. has developed high-performance fabrics that withstand the harsh environments military, law enforcement, fire and rescue professionals encounter on their missions. Gore combines research in the fundamental science of fluoropolymers with a thorough understanding of the challenges these professionals face to engineer durable protective fabrics. After extensive laboratory testing and field trials, Gore stands behind these fabrics, ensuring that each product does what we say it will do.

PERFORMANCE ENHANCING DESIGN FEATURES

- 100% Waterproof & Breathable
- Long-wearing wicking lining absorbs perspiration, dries quickly, and resists odor and mildew.
- Enhanced lacing system with speed-lace eyelets.
- Shock absorbing cushioned outsole
- Non-marking outsole resists contamination by jet fuel and oil
- 2 pair of 200-gram insulated, removable booties included with each pair.
